

Bug: User can flip through to the next page even if there are no pages left

Steps to reproduce:

1. Navigate to <https://buggy.justtestit.org/overall>
2. Scroll down to the arrow buttons for page navigation
3. Click the right (“»”) arrow repeatedly

Severity: High

Impact: Medium

Expected result: Similar to the left arrow, the right arrow should be disabled to prevent the user from navigating further than the last page.

Actual: Even if the user reaches the last page, the arrow is not disabled and the user is able to proceed to pages that are over the limit.
